

HB Rollcontainer

The two-sided roll cage

HB Rollcontainer is a two-sided roll cage, developed to transport any type of supermarket products in cardboard carton, plastic crate, box, or any other packaging.

Perfect for mechanical and automated handling. It can easily be handled mechanically from the long side using e.g. pallet or forklift truck.

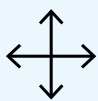

A safe lift-up hinged base and swing-back sides ensure that for return logistics and storage it condenses to a fraction of its loaded volume.

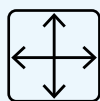

Adjustable straps make sure, that the goods won't fall off the open sides of the cage. The straps are easily attached and released.

Easy picking and packing due to the two open sides of the cage and easy manual handling. One person can roll it alone, even without lifting equipment.

Specifications

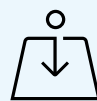

800 x 665 x 1900 mm
